PROFESSIONAL SUMMARY

Full-stack software developer with professional experience across web application development, IT systems, data management, and workflow automation. Skilled in TypeScript, JavaScript, React, Next.js, Node.js, Express, MongoDB, REST APIs, authentication, cloud services, and containerized deployments. Experienced in building secure enterprise applications, microservices, payment workflows, file-storage systems, and AI-assisted automation pipelines. Strong problem solver who translates operational requirements into maintainable software, communicates clearly with stakeholders, and supports systems from development through deployment and production troubleshooting.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), TypeScript

Backend

Node.js, Express.js, RESTful APIs, API Gateway, RabbitMQ, Nodemailer

Architecture and security

Microservices, MVC, Controller-Service-Repository, SSO, OAuth, JWT, RBAC

Tools

Git, GitHub, Postman, Figma, VS Code

Frontend

React.js, Next.js, Tailwind CSS, HTML5, CSS3, Redux Toolkit, Context API, Framer Motion, GSAP, Lenis Scroll, shadcn/ui, Material UI

Databases

MongoDB, Mongoose, PostgreSQL, Firestore, Firebase, NoSQL

Cloud and DevOps

Docker, Docker Compose, Kubernetes, GitHub Actions, AWS EC2, AWS S3, Google Cloud, Nginx, CI/CD

SELECTED PROJECTS

Integrated Automotive Digital Ecosystem – Aladdin Drive, *Full-stack automotive digital showroom*

- Built a responsive digital showroom using Next.js, React, Tailwind CSS, and shadcn/ui.
- Implemented Google OAuth and Magic Link authentication with Auth.js.
- Integrated PayPal and Stripe for checkout, invoicing, and payment workflows.
- Designed MongoDB data models and an administrative dashboard for product, user, and order management.

Office Management System – SSO + RBAC, *Microservices-based enterprise platform*

- Built and deployed five or more microservices using Node.js, Express, and MongoDB.
- Implemented JWT authentication and role-based authorization for secure, multi-role access.
- Applied Controller-Service-Repository architecture to create modular and maintainable APIs.
- Containerized services with Docker, deployed on Kubernetes, and automated CI/CD with GitHub Actions.
- Built a responsive React frontend for staff and user operations.

Blog Microservices Platform

- Built User, Post, and Comment services with API Gateway routing and RabbitMQ-based communication.
- Containerized the platform with Docker Compose and automated delivery using GitHub Actions.

Dropbox Clone — File Storage Application

- Built a file-storage application with Next.js, TypeScript, Tailwind CSS, and shadcn/ui.
- Integrated Firebase Storage and Firestore for file uploads and metadata management.
- Implemented drag-and-drop uploads, sorting, renaming, deletion, loading states, toast notifications, and theme switching.
- Deployed the application on Vercel.

Premium Cinematic Portfolio

- Engineered an immersive, responsive portfolio using GSAP, Framer Motion, and Lenis Scroll.
- Integrated Nodemailer for secure contact functionality with environment-based configuration.

PROFESSIONAL EXPERIENCE

Private Flyers International Limited, IT & DATA MANAGER

Kaduna, Nigeria

08/2024 – 03/2025

- Managed IT infrastructure, business applications, and operational data supporting day-to-day business activities.
- Monitored enterprise systems and investigated incidents using structured troubleshooting to minimize disruption.
- Maintained data integrity and security across operational systems and business workflows.
- Improved internal reporting and workflow processes through automation and better data-management practices.
- Worked with business stakeholders to understand operational problems and implement practical technology solutions.
- Maintained clear documentation and communication around technical and operational issues.

National Assembly of Nigeria, NETWORK SERVICE AGENT

Abuja, Nigeria

09/2021 – 04/2022

- Provided technical support for network, hardware, and communication infrastructure across departments.
- Diagnosed connectivity, hardware, and other ICT-related issues and supported users in restoring normal operations.
- Escalated complex incidents appropriately and collaborated with ICT personnel to resolve them.
- Worked in a structured institutional environment where reliability, responsiveness, and clear communication were essential.

JD Marc Limited, Product Developer

Abuja, Nigeria

05/2025 – 01/2026

- Supported enterprise technology operations across multiple departments, troubleshooting application, authentication, access, and infrastructure issues.
- Built and supported an enterprise web application with single sign-on (SSO) and role-based access control (RBAC).
- Deployed AI-assisted automation pipelines that removed approximately 40% of repetitive manual workflow steps, freeing engineering capacity for feature development.
- Maintained and monitored production and staging environments, contributing to reliable service availability and faster identification of technical issues.
- Collaborated with technical and non-technical stakeholders to clarify requirements, communicate solutions, and coordinate issue resolution.
- Documented technical issues, actions, and outcomes to support consistent operations and follow-up.

EDUCATION

Bachelor of Science in Computer Science, Federal University of Lafia

Lafia, Nigeria

2019 – 2023

CERTIFICATIONS AND COURSES

Data Analytics Certificate, *IBM SkillsBuild / University of the People*

04/2026 – Present

CS50: Introduction to Computer Science, *Harvard University via edX*

2026 – Present

LANGUAGES

English • Hausa • Ebira
